

‘Death Con Three on the Jews’: An Analysis of Jewish Life in America Amid Trends of Growing Antisemitism

Ruty Korotaev

3/13/23

Amid trends of growing antisemitism in the United States and across much of the Western world, this report will look at survey data of American Jews between the years 2000 and 2021. The report explored variables related to how Jewish respondents identified, how closely affiliated they were to their identities, as well as demographic data related to their specific Jewish denominations, spousal religion, and upbringing. This data demonstrates that over the last 20 years_____

Introduction

This paper will be about Jewish life in America, based on data collected from the United States’ General Social Survey.

Data

As mentioned, this data was collected from the United States’ General Social Survey, which works to _____.

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

Results

Based on the above visualizations, it is clear that Jewish life and identity within the United States changes based on the real or perceived threats of antisemitism.

Additionally, as the data shows, the demographic that is growing the most – Orthodox and immigrant Jews – is frequently left out of the conversation surrounding Jewish life in the United States, with many of the Jewish voices being of those who are at two to three generations living in the US, most commonly those who are of the reform denomination.

Discussion

Appendix: Supplemental Survey

This survey could be improved in a variety of ways. Below are questions that would have helped strengthen the quality of the questions, as they provide more nuance and understanding.
